StoneScapes® Mini Aqua Blue

The secret to

Beautiful Pool Water

is selecting the right interior pool finish for you.

StoneScapes scientifically formulated surface systems create consistent, dependable color. Thanks to our select, smooth, polished pebbles, StoneScapes finishes are easyon hands and feet.

Need help making a final decision?

First, Decide...

whether you would like the water in your pool to appear blue or green.

For water that looks

Primarily Blue,

select a finish with white, blue, or gray pigment.

For water that

Appears Green,

look for green, tan, brown, or black pigment.

Achieve
deep, rich water color.
{ 9 Feet Deep }
{ 4 Feet Deep }

The Darker Your Finish,

the darker your pool water will be.

The deeper the water,

the darker it will appear.

Water will seem lighter in shallower areas like steps, ledges, benches, and beach entries where the finish itself is more visible.

Beauty, More than Surface Deep...

To achieve a deep, rich water color in a pool without a deep end, select a dark colored pool finish.

Your pool's depth has a huge impact on the color of your water.

Your pool may actually appear deeper when you select a finish with a darker pigment.

Mirror
your surroundings.

Since Your

Pool Water

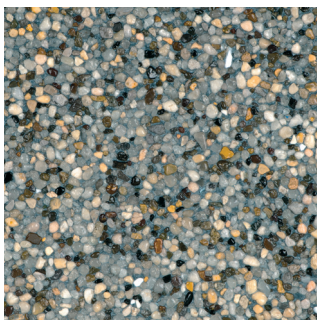

will mirror its surroundings, many other factors will impact water color:

- The design, shape, and depth of your pool
- The time of day and position of the sun
- Whether the sky is sunny, stormy, or overcast
- Your region of the country
- The chemistry of your water
- Landscaping, trees, bushes, and other foliage
- Colors in your home's exterior

StoneScapes® Mini

Tahoe Blue

Pool Finish

Subtle Changes

in the appearance, created by the play of sunlight and shade, are part of the

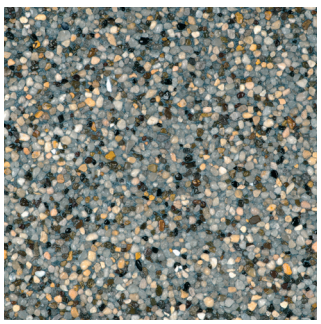

Inherent Beauty

of your pool finish.

The color of your Pool Water will be

Uniquely Yours.
